

Global Excellence in Molecular Signalling and Pathways: Central and South America

Global collaboration is the cornerstone of scientific advancement.

Frontiers in Molecular Neuroscience has organized a series of special edition Research Topics, with the goal of highlighting the latest advancements in molecular signalling and pathways across the globe, showcasing the academic excellence and high-quality work of internationally recognized researchers.

These collections aim to shed light on the recent progress made across the entire breadth of the molecular signalling and pathways field and reflect on the future challenges faced by researchers across borders.

This Topic solicits submissions from authors associated with Central and South America.

Topic Editors

Braulio Muñoz Ramirez

School of Medicine,
Indiana University Bloomington

Christian Peters

Max Planck Institute of Neurobiology (MPIN)

Mariano Soiza-Reilly

CONICET Institute of Physiology,
Molecular Biology, and Neurosciences

Gonzalo Yevenes

University of Concepcion

Gustavo Moraga-Cid

University of Concepcion

Submission deadlines

Manuscript: 23 September 2022
